Dear Major Quintanella

My husband and I were most pleased to see the article in LIFE about Project Bluebook. Until we received this magazine, today we had resigned ourselves to never finding out just what we really did see last Sunday night on our way home from the City (Fall River, Mass.)

We simply decided that the <u>huge, brilliant orange crescent shaped moon</u> we followed would be our secret. – Who would believe us!? Most people we know would just laugh as if we were crazy – Still who ever heard of just such a "moon" at midnight on the <u>extreme</u> western horizon. It seemed to be practically sitting on the rooftops of So. Somerset, Mass, then practically joining the gaudy orange roofs of the Howard Johnson Compound., then we thought that maybe the

Could you help us decide on what we saw? We would appreciate any information you might send us.

We're not kooks with dirty, long hair and banjos. We're not looking for notoriety, or making up a wild tale. We honestly saw this.

A picture in the "Life" has the same brilliant orange color, but what we saw was in a vertical position, and very definitely crescent-shaped. As we faced it, the right side was very smooth; the left irregular. We saw no green lights or flashing colors ect.

Thank you very much for any clarification you may give us.

Sincerely yours
Mrs. [redacted]

tiny gospel chapel just over the Lee's River into our town (Swansea) had some kind of gimmick spotlight. But how could we've seen this from the Slades Ferry Bridge at the Eastern border of Somerset??
We were facinated. So I instead of turning off of the highway on our street, we drove to the barest, openest spot in town.-
At the end of a barren beach we have a long road to a boat ramp. - Here we again saw this cresent practically sitting on the treetops ahead of us on the far shore line.
Then - - just like the setting sun, this beautiful? object slipped over the edge of the horizon and disappeared. We stayed for a long time at the end of the land hoping it would re-appear, It didn't.

This happened Sunday, March 27th at 11 45 PM to just after midnight. No fog or mist atall.
